PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in data engineering, business intelligence, and machine learning. Built ETL pipelines, automated reporting systems, and interactive dashboards using Python, SQL, and Power BI. Developed end-to-end analytics and ML projects including churn prediction and full-stack data platforms. Seeking roles in Data Engineering, Data Analytics, or Business Intelligence.

EDUCATION

Karakoram International University, Gilgit | *Bachelors, software engineering*

Gilgit Sep 2021 - Sep 2025

SKILLS

- Data Engineering & Databases:** Python, SQL, ETL pipelines, data cleaning, MySQL, PostgreSQL, SQL Server, data modeling (ERD, star schema), query optimization
- Data Analytics & Reporting Systems:** Power BI (DAX, dashboards, KPI reporting), Tableau, Excel (advanced analysis, reporting automation), data visualization
- Data Integration & Pipelines:** API-based data ingestion, structured data pipelines, workflow automation concepts, pipeline design
- Tools & Collaboration:** Git, GitHub, CI/CD basics, Agile development practices

EXPERIENCE

Precise Tech | *Business Intelligence Analyst (Intern)*

Sep 2024 - Jan 2025

- Analyzed 100K+ automotive market records to identify trends across vehicle segments, enabling more accurate reporting and improving business insight quality
- Designed and optimized ETL workflows using Python and SQL to streamline data extraction and transformation, reducing processing time by 35%
- Built and maintained 5+ Power BI dashboards tracking KPIs, vehicle performance, and segmentation metrics to support business decision-making
- Automated recurring reporting processes using SQL and Python scripts, reducing manual effort by 30% and improving reporting consistency

Living Path | *Data Management Intern (Remote Summer Internship)*

Jul 2025 - Aug 2025

- Cleaned and validated large-scale datasets for senior housing market research to improve data reliability and analytical accuracy
- Developed Python and SQL-based data preparation workflows to streamline preprocessing tasks and reduce manual effort by 20%
- Conducted demographic and market analysis to support research-driven decision-making and improve insight quality
- Implemented GitHub-based version control workflows to improve collaboration efficiency and reduce integration conflicts

PROJECTS

Aether Insight Platform | Data Analytics System

Sep 2025

- Built an end-to-end data pipeline to ingest, clean, and transform multi-source EV market and user data using Python and SQL
- Designed modular analytical workflows for segmentation, trend analysis, and comparative evaluation of structured datasets
- Implemented FastAPI services with MySQL database architecture to enable structured data storage and retrieval
- Developed a Next.js-based analytics interface to visualize insights and support decision-making

Compound Verse | Behavioral Tracking System

Feb 2026

- Built a full-stack behavioral tracking platform addressing limitations of streak-based systems that often lead to user drop-off
- Designed a structured system for long-term consistency tracking based on compound behavior principles
- Developed a role-based personalization engine using Next.js to generate adaptive daily focus paths
- Implemented FastAPI and MySQL backend to manage user state, progress tracking, and persistent behavioral data storage

Final Year Thesis: Duolingo User Churn Prediction (ML & DL)

Jun 2025 - Sep 2025

- Built machine learning models using Python, Pandas, and Scikit-learn to predict early user churn using the Duolingo SLAM 2018 dataset
- Performed feature engineering on learner interaction logs to extract behavioral patterns influencing retention outcomes
- Trained and evaluated ML and deep learning models including MLP and LSTM networks for sequential behavior prediction
- Applied ethical AI principles to evaluate model interpretability and behavioral bias in churn prediction outcomes

CERTIFICATIONS

- Python for Data Science, AI & Development-IBM (87.5%)
- Introduction to Data Engineering – IBM (97.40%)
- Business Intelligence (BI) Essentials – IBM (88.33%)
- Foundations: Data, Data, Everywhere – IBM (91.75%)
